

# Extreme Protection...

## for Your Manual Gear & Transmission

## MANUAL GEAR & DIFFERENTIAL

An additive designed for use in automotive and industrial gear boxes. The product will reduce noise, friction and heat, as well as extend the life of the oil.

### USE

For use in manual transmissions, differentials, wet lubed bearings and gear boxes.

### BENEFITS

- Reduces wear, heat and noise
- Protects against corrosion and moisture contamination
- Reduces parasitic friction present in all gear systems
- Protects seals from aging, drying and cracking
- Extends lubricant life and serviceability
- Increases lubrication film strength up to 230,000 psi
- Eco-friendly and non-reportable
- Creates extra protection in extreme environments

### MIXTURE

- Add 5% per volume of present lube oil.
- May be used in all known lubricants of any weights including synthetics.
