

Enhanced Performance for Today's Fuels

New Eco-Friendly Technology

MICRO MOLECULAR FUEL ENHANCER

Description

Formulated for light-duty diesel and all gasoline engines to provide maximum fuel efficiency and protection in today's fuels. Safe for all engines new and old, carbureted and fuel injected. Removes carbon deposits, water and varnish from fuel systems. Reduces harmful effects caused by Ethanol and Bio-Fuels to hoses and seals. Helps protect against corrosion and replaces much needed lubricants in fuels. Completes the burn cycle of hard to burn fuel molecules yielding more power and creating fewer emissions.

Environmentally Friendly Fuel Enhancer Designed for Light-Duty Diesel and Gasoline Engines

- Reduces Fuel Consumption up to 10%
- Reduces Emissions up to 50%
- Cleans Entire Fuel System
- Provides Extreme Lubrication
- Works With Petroleum and Ethanol (Bio-Fuels)
- Will Not Harm Engines or Fuel Systems
- Concentrated Formula 1oz to 25 Gallons of Fuel
- Increases Power
